

Induction stock pot

Manufacturer: Locher Großküchen – Geräte GmbH

Model: 201250

Description:

High power electric induction stock pot for stationary use.

Compact unit with stainless steel frame and flush mounted ceramic glass plate. Removable bottom plate for after sales servicing. Rounded angles and smooth surfaces enable easy cleaning of the unit.

Energy transmission through induction coil underneath the ceramic glass. The generator is positioned under the coil. In the case of maintenance, the connectors of the generator can be easily disconnected.

Utmost operational security thanks to:

- Electronic surveillance of the energy flow
- Empty pan detection (in the centre of the zone ; causes power reduction and automatic turnoff)
- Electronic temperature surveillance of the coil, the generator and the control PCB
- Residual heat signal lamp under glass in front panel

The zone is operated through a step less potentiometer. A LED display under glass shows the selected power level (1-9) and eventual malfunctions.

Each generator has integrated fans, so air circulation is guaranteed. Unit comes with 4 non-slip feet that are adjustable in height (up to 665 mm), CE-power cable, air duct and extractable metallic air filter (dishwasher safe).

Suitable for pots up to 70 ltr. of capacity.

Minimum pot bottom diameter Ø240mm.

Technical data

Width:	480 mm
Height:	480 mm
Depth:	465 mm
Glass dim.:	468 x 468 x 6 mm
Coil dim.:	round Ø 380 mm
El. connection:	400 V / 9,0 kW

07/15 Dimensions and images are indicative. We reserve ourselves the right to modify any data without prior notice.
Shown colours may differ due to printing process.
